

## Business Studies Curriculum Overview - Year 11

	Unit	Details
Autumn One	Finance	Pupils learn how to calculate profit, break-even, cash flow and financial ratios to assess business performance. We also establish different methods of finance that are available to businesses to fund growth.
Autumn Two	Year 11 assessment: preparation and feedback	We recap the learning so far and look to further develop pupils' exam skills. Pupils will sit a mock exam in preparation for the final exams, to check their understanding of the topics they have studied and to highlight any areas of development that we will tackle.
Spring One	Influences on business	Pupils explore factors external to a business that will impact upon its performance and decision-making. Firstly, we look at the importance of a business behaving ethically towards its stakeholders and how it should look to minimise its environmental impact.
Spring Two	Influences on business	We then look at the economic climate and globalisation in terms of how employment rates, taxes and international trade can impact a business and its functional areas.
Summer One	Preparation for final exams	We help to prepare the pupils for their final GCSE exams by revising the topics we have studied and building their confidence in answering exam-style questions.
